

Data Mapping Template - ODS / API v2.0

Previous Version

This is a previous version of the Ed-Fi ODS / API. Visit the [Ed-Fi Tech Docs home page](#) for a link to the current version, or the [Ed-Fi Technology Version Index](#) for links to all versions.

Overview

Data mapping is an early step in the requirements gathering and development process of interoperability projects. The attached data mapping template is an Excel file to assist with mapping from source data systems to the Ed-Fi Data Standard v2.0.

The template contains a listing of all elements in the Ed-Fi data model, and includes data to support filtering by Ed-Fi Standard Interchange Schema XSD files or Ed-Fi ODS / API resources.
