Business Rules

Business Rule Tests

SpecFlow tests for the District College Entrance Exams SAT/ACT metric business rules can be found [here](#).

Summary	Description	Testing Location	Key
Assessment Context	<p>For container level metrics, the context displays the max administration date of assessments included in the metric calculation. The format for the context should be "Through (Max administration date)".</p> <p>Note: If there are no assessments included in the metric calculation, then the context is empty.</p>		MET-372
District - Difference from Goal	For a district with a metric value calculated, Difference from Goal = District goal - Metric value		MET-260

Metric Not Calculated when Denominator is Zero	For metric calculations that produce a ratio, if the denominator is 0, then the metric is not calculated.	MET-30
Metric State - Positive Trend - District	If the metric value is greater than or equal to the district goal, the metric state should be "1-Good". Otherwise, it should be "3-Bad". If no school goal is set, the value will be compared against the metric default value.	MET-204
Metric Status - Positive Trend - District	If the metric value is greater than or equal to the district metric goal, the status should be green. Otherwise, it should be red.	MET-21
SAT or ACT Taken - District	For enrolled students, calculate the percent of students that have taken an SAT or ACT exam in the district per grade level. District SAT/ACT Taken = (Students that have taken an SAT or ACT exam per grade level) / Total number of enrolled students in the district per grade level. Note: This metric only includes students in 9th-12th grades.	MET-162
School Attainment - District	School Attainment = Total number of schools that met school goal / Total number of schools in district with a metric value.	MET-257
